Bio

A highly motivated individual with a passion for software development and design. I have been actively developing my own projects for the past 2 years and continue to up my skill-set on a daily basis. My core interests are developing apps in Java and Angular 2+. My motivation is to create and deliver quality, intuitive software that other developers and users will want to use with an attention to even the minutest of detail.

Skills

Programming: Java, IntelliJ IDEA, Eclipse IDE, JUnit, Spring MVC, REGEX, Git, JIRA, Docker, JDBC

Web Development: HTML, CSS, Bootstrap, JSON, REST API's, PHP, phpmyadmin, SQL, JSON, Javascript, yaml

Unix: Shell scripting, Unix command line

Other skills: WireShark, VMware, Network protocols, Knowledge of computing hardware (built my own custom PC)

Experience

Astreya @ Google / Equipment Maintenance Technician

OCTOBER 2018 - OCTOBER 2019, Google Barrow Street, Dublin

- Managing hardware and accessory deployment to front line users at Google's European headquarters in Dublin
- Laptop and desktop imaging, deployment and recovery
- Technical maintenance and troubleshooting to support issues
- Contributing to large scale global projects as needed
- Using ticketing systems to report individual work accomplishments and to track Service Level Agreements (SLAs)
- Ensuring audio and visual quality, troubleshooting any issues that may arise and any requests from meeting attendees.

-

Education

Dublin City University / Bsc. Enterprise Computing

SEPTEMBER 2014 - JUNE 2018, Glasnevin, Dublin

Modules included but are not limited to:

1. Fundamentals of Computer Programming
2. Networks and Internet & Managing Enterprise Computer Systems
3. Web Programming
4. IT Mathematics
5. Developing Internet Applications
6. Software & Systems Testing

Full list of modules can be viewed at: <https://bit.ly/32U6V3f>

St. Fintan's High School / Leaving Certificate

Obtained my Leaving Certificate with all higher-level subjects including higher-level mathematics.

Projects & Courses

University of Helsinki Programming with Java MOOC - An online open course that makes use of the IntelliJ IDE using an embedded plug-in which allowed me to refresh on the basics of computer programming, algorithms and object-oriented programming using the Java programming language.

CRUD Application - Built a basic CRUD Application using Angular & Spring Boot that displays a list of cars. It allows you to edit the cars, and then shows an animated gif from GIPHY that matches the car's name.

Building Your First Web App with HubSpot Academy - The online course is designed to teach how to build a web application from scratch; it allowed me to get familiar with using GitHub, Heroku, and node.js, as well as how to stylize my application and integrate an API.
